CNN 10

2026.08.07 / 听力挖空练习

How an insect-eating plant is proving Charles Darwin right 150 years later

共30题。每空填写原文中的1至3个英文单词；留意拼写、单复数及词形。

方括号[01]为题号，P01为原稿段落号。答案集中在末页，练习时请先遮住。

建议先浏览正文，再配合本期视频听写；完成后重听检查，每题1分，满分30分。

姓名：_____ 练习日期：_____ 得分：___ / 30

依据用户提供的字幕原稿制作，未与视频核验。难度参考雅思听力，采用原文挖空形式，非官方模拟试卷。

日期说明：本篇原稿未标日期；沿用中英对照稿暂定的2026年8月7日，日期尚未核实。

听写正文 / QUESTIONS 01–30

P01 What's up, sunshine? This is CNN 10. And today we have fire season rewriting record books. Why America just hit the brakes on foreign made robots and a cyclist taking the ultimate NFL road trip with nothing but two wheels and a whole lot of grit.

P02 I'm Coy Wire. And we begin today with the Pacific Northwest where destructive wildfires are wreaking havoc across Washington and Oregon, as the states endure their worst fire season in more than 30 years. In Washington's Spokane County, a trio of fires has consumed more than 10,000 acres so far with zero percent [01] _____ since they started over the weekend.

P03 The fires have forced the [02] _____ of nearly 65,000 in Spokane area alone, and more than 700 structures have been destroyed.

P04 This all happened in a matter of hours. In other words, individuals woke up in their homes Saturday morning. In a matter of hours, their homes and neighborhoods were just [03] _____. This happened very, very quickly.

P05 No injuries or deaths have been confirmed as of this taping, but officials said that the scale of the fires means it will take time to fully [04] _____.

P06 Law enforcement says a man has been arrested on an arson charge in connection with one of those, and fire officials are still [05] _____ the cause of the other blazes. The Pacific Northwest isn't the only region feeling the impact from wildfires. More than 27,000 firefighters across the country are battling at least 100 uncontained fires as of this taping, and that was just this week alone.

P07 Wildfires have scorched at least 5.3 million acres across the country so far this year, already [06] _____ last year's total for the entire year.

P08 We've shown you videos of robot dogs, humanoid robots. Well, now importing those will be banned in the U.S. The U.S. Federal Communications Commission, or FCC, says that importing advanced robotics from certain foreign countries poses an unacceptable risk to the [07] _____ of the United States. Our Mike Valerio will tell us more.

P09 You want to bring a robot like this from China into the United States? Well, forget it. New foreign robots are now banned.

P10 The Federal Communications Commission in Washington just ruled advanced robotic devices produced in foreign countries, quote, pose an unacceptable risk to the national security of the United States. The ban only applies to new [08] _____, not any devices already stateside.

P11 This comes after robots from Chinese companies like Unitree have wowed millions on social media, becoming more familiar to Americans, and even taking the stage on America's Got Talent.

P12 So the U.S. government now says that relying on foreign produced advanced robotic devices presents unacceptable [09] _____ and cybersecurity vulnerabilities.

P13 Gesundes say advanced robotic devices [10] _____ that could be leveraged by malign actors to surveil Americans, enhance the capabilities of foreign intelligence services, or to remotely commandeer the robots.

P14 90% of the world's humanoid robots are made in China, with more than 140 companies competing in a crowded and quickly [11] _____.

P15 Robotics companies and China's Ministry of Commerce for now are not publicly reacting. The move is another potential point of friction as the U.S. and China try to stabilize ties. The FCC says it's possible to

avoid the ban if a company applies for an [12] _____, proving the product does not pose a risk and that's signed off by the Pentagon.

P16 This imports ban mirrors other U.S. prohibitions of Chinese tech, like [13] _____ from Huawei and Chinese EVs kept out of the U.S. market.

P17 Now to a story about the impact that space junk is having on the moon. And by impact, I mean literally.

P18 A piece of SpaceX Falcon 9 rocket slammed into the moon earlier this week at nearly seven times the [14] _____. The rocket launched about 18 months ago, and its upper stage was intentionally left drifting through space after completing its mission. Normally, leftover rocket parts eventually fall back to Earth and burn up as they enter our atmosphere.

P19 Not this one. Officials say it blasted a crater roughly the size of a Major League Baseball infield. No one could actually see it happen with the [15] _____.

P20 Instead, astronomers used a special [16] _____ to see glowing plumes of lithium and sodium gas being kicked into space, almost like the moon briefly left behind its own cosmic fingerprint.

P21 Pop quiz, hot shot. Which U.S. state is home to the only native population of Venus flytraps?

P22 Florida, Hawaii, North Carolina, or California?

P23 If you said North Carolina, you so fly.

P24 Venus flytraps only thrive in bogs and [17] _____. In the wild, nearly all of them grow within a tight 70 to 100 mile radius around Wilmington, North Carolina.

P25 More than 150 years after evolutionary scientist Charles Darwin made a bold [18] _____, science just proved him right.

P26 Darwin believed certain carnivorous plants like Venus flytraps didn't just trap insects, they actually digested them. Back then, he didn't have the technology to prove it. Now, scientists in China use modern genetic and chemical testing on a plant called the saxifraga and confirm that those sticky little plants really do absorb [19] _____ like nitrogen from the bugs they catch.

P27 Darwin also believed carnivorous plants evolved because they grew in nutrient-poor soil. Turns out he nailed that too. Carnivorous plants still get most of their energy via [20] _____, just like other plants.

P28 NFL players spend months preparing for a season, one fan is spending 10,000 miles getting ready for week one. 22-year-old ultra-endurance cyclist Bond Almand is currently on a 10,000 mile quest to visit all 30 stadiums by bike ahead of the league's kickoff in Seattle next month. That's roughly the distance from New York to Tokyo and halfway back.

P29 One of our fearless CNN 10 teammates, Brendan, caught up with Bond outside of Atlanta's Mercedes-Benz Stadium to hear how the trip is going and see what motivates him to push himself to the limit in [21] _____ of greatness.

P30 Most mornings when I wake up, I do not want to get on the bike, I'll be honest. And after a couple hours of riding, I've warmed up, I feel good, I'm loving it.

P31 The bike can take me anywhere, it's a great way to explore.

P32 This is Bond Almand, a one-of-a-kind ultra endurance cyclist who's taking his sport to the next level, one pedal at a time. At just 22 years old, he already has five world records.

P33 In 2024, he shattered the record for fastest north-south Pan-American bike crossing, completing all 14,000 miles from Alaska to Argentina in just 75 days, all of this while [22] _____ at Dartmouth College. Now, the recent grad is spending his summer chasing a new goal, crisscrossing the country on a quest to visit all 30 NFL stadiums. The epic odyssey is the brainchild of Extreme Networks, who pitched the idea to Bond earlier this summer, and even he couldn't believe it.

P34 He originally came to me with the idea, and I was like, that's a great idea, but yeah, there's no way that ever happens. And then he called me a week later and was like, okay, we're all set. Bond set out from Miami on July 7th, carrying a special NFL game ball destined for the league's kickoff game in Seattle on September 9th.

P35 The scenic, and I mean [23] _____, is giving him a view of the country that few people ever get to see. But the trip is anything but a leisure ride. Bond is averaging up to 200 miles per day, sometimes climbing as much as 20,000 feet. That's like summiting Mount Kilimanjaro, and mileage like that takes a physical and mental toll.

P37 The [24] _____ every single day, that stress in your body, it's hard to understate. Obviously, I'm one person, but there's like a side of me that wants you to stop and rest. Those two sides have to make peace.

P38 His biggest challenge so far, not the hills, the heat. Bond is losing gallons of sweat every day, so he's found some unique ways to stay [25] _____.

P39 I take a lot of table salt and just pour it straight into my [26] _____. You can kind of see the salt on your skin, that's all that sodium you're losing. My favorite drink hack is coffee creamer.

P40 If you get a bottle of coffee creamer like this, it has several thousand [27] _____ in it.

P41 From serene back roads to bustling city centers, Bond is documenting the entire trip on social media, hoping it'll help [28] _____ for other cyclists.

P42 I've been hit by a couple cars before and that really rattles me.

P43 It's always in the back of the mind on the bike and it's part of why I love biking and sharing my story is to kind of get people more familiarized with biking. And if a couple of drivers can see my videos and be excited about biking, maybe give the next biker a little bit more space when they pass, then that's a huge win.

P44 By the time Bond rolls into Lumen Field on September 9th, he'll have clocked more than 10,000 miles, about the same amount most people put on their cars in a year.

P45 And on a trip this big, sometimes the biggest challenge isn't the terrain, it's staying [29] _____.

P46 One thing that I've suffered with a bit is burnout. I do love my bike and it brings me a lot of joy, but there are days when it just doesn't.

P47 So having that like higher purpose, like what is the goal of riding, why am I doing this, is always important.

P48 His advice for the next generations of endurance cyclists looking to make their own marks?

P49 Believe in yourself more than anything. I was always told from a young age, like do whatever you love, follow your dreams. I think that's 100% true, but it's more complicated than that. I think it's do what you love, but have intention, have some idea of where you want it to take you.

P50 For Bond, that somewhere is chasing the horizon one mile at a time.

P51 Today's story, getting a 10 out of 10, who let the dogs out?

P52 Dozens of four-legged surfers took on some radical waves in Northern California at the 10th annual World Dog Surfing Championship this week. Spectators flocked to the beach and judges scored the pups on how long they could stay on their board, wave size, and [30] _____.

P53 Surfing is amazing anyways, right, because you're you're community with nature, it's you've got the solitude, you got the Indian, you got the excitement, and then you mix in your best friend because then you're working together as a team to accomplish something.

P54 The contest was cut short because of some rough waves before the final surf off, but that just means they're all winners in our hearts.

P55 All right superstars, we're sending some love today. First, we're going to reach Columbus in Indiana. Thank you for your kind letters. We are so glad you spent part of your summer with us.

P56 And this next shout out goes to Coach Bradley at White House Heritage High School in Tennessee. Rise up. Thank you for commenting and subscribing to our CNN 10 YouTube channel.

P57 Go out, make someone smile, make someone laugh this weekend.

P58 Remember, you are more powerful than you know. I'm Coy Wire and we are CNN 10.

参考答案 / ANSWER KEY

2026-08-07 · 共30题。以下为对应空格的原文答案；P编号便于回查中英对照稿。

本练习自评时不区分大小写，拼写与单复数须符合原文。每题1分；此分数不换算为雅思分数。

题号	答案	段落
01	containment	P02
02	evacuation	P03
03	wiped out	P04
04	evaluate	P05
05	investigating	P06
06	surpassing	P07
07	national security	P08
08	imports	P10
09	supply chain	P12
10	collect data	P13
11	expanding market	P14
12	exception	P15
13	communications equipment	P16
14	speed of sound	P18
15	naked eye	P19
16	telescope	P20
17	wetlands	P24
18	prediction	P25
19	nutrients	P26
20	photosynthesis	P27
21	pursuit	P29
22	balancing his studies	P33
23	scenic route	P35
24	cumulative fatigue	P37
25	hydrated	P38
26	water bottle	P39
27	calories	P40
28	raise awareness	P41
29	motivated	P45
30	confidence	P52
