CNN 10

2026.08.18 / 中英对照学习稿

A famous spy plane just uncovered how wildfires create storms

著名侦察机揭示野火如何制造风暴

根据用户提供的 english.txt 整理并翻译。英文段落下方为对应中文，原稿词汇注释收于文末。段落编号用于对照，原稿未提供时间码。

文字说明：保留英文原稿；译文按所给文本和上下文处理，未与视频核验。无法确定的听写或残句在译文中注明。

正文 / 英文与中文逐段对照

01 What's up, sunshine? I'm Coy Wire. This is CNN 10, your daily 10 minutes of news where I simply tell you the what, letting you decide what to think. Thank you so much for spending part of your day with us.

阳光伙伴们，大家好！我是科伊·怀尔。这里是CNN 10，每天十分钟新闻，我只告诉你发生了什么，由你决定如何思考。非常感谢你抽出时间陪伴我们。

02 Let's get smarter. Now, we begin today in the Democratic Republic of Congo, where an Ebola outbreak has crossed a grim milestone. It is officially the deadliest Ebola outbreak in the country's history.

一起长知识吧。今天先看刚果民主共和国，埃博拉疫情跨过了一个令人痛心的节点，正式成为该国历史上死亡人数最多的埃博拉疫情。

03 More than 2,300 people have died. Nearly 5,000 cases have been confirmed, surpassing the death toll from Congo's devastating 2018 to 2020 outbreak. This outbreak is being driven by the Bundibugyo strain of Ebola, a rare form of the virus which there is no currently approved vaccine or proven treatment for.

已有两千三百多人死亡，确诊病例近五千例，超过刚果2018年至2020年严重疫情的死亡人数。这次疫情由罕见的本迪布焦型埃博拉病毒引起，目前没有获批的疫苗或经过证实的治疗方法。

04 Its fatality ratio is nearly one in every two cases. Clinical trials are underway for a strain-specific vaccine, as well as two antiviral therapies. The outbreak was officially declared in May, but officials believe it may have started as early as February.

病死比例接近每两名患者就有一人。针对该毒株的疫苗和两种抗病毒疗法正在进行临床试验。疫情于五月正式宣布，但官员认为可能早在二月就已开始。

05 Ebola spreads through direct contact with bodily fluids of infected people, and can cause fever, vomiting, diarrhea, and in severe cases, internal and external bleeding. Much of the outbreak is occurring in areas already dealing with weak health care systems, community resistance, and political instability.

埃博拉通过直接接触感染者体液传播，可引起发热、呕吐、腹泻，严重时会出现体内及体表出血。疫情多发生在医疗体系薄弱、社区存在抵触情绪、政治局势不稳的地区。

06 Now to Hawaii, where Hurricane Lala has moved on, but for much of the Big Island, the cleanup is just beginning.

接下来看夏威夷。飓风拉拉已经离开，但大岛大部分地区的清理才刚刚开始。

07 The governor says at least 100 homes have been damaged. Check out this video from the Hawaii National Guard. The sheer force of the water at the height of the storm pushed a truck off the road.

州长表示，至少一百栋住宅受损。看看夏威夷国民警卫队的视频，在风暴最强时，洪水的力量直接把一辆卡车冲出了道路。

08 Over 30 inches, that's two and a half feet, of rain falling in some areas of the Big Island. But weather forecasters are hopeful that the rest of the Atlantic hurricane season, which ends in November, will remain quieter than normal. One reason? Something happening thousands of miles away in the Pacific Ocean, El Nino.

大岛部分地区降雨超过三十英寸，也就是两英尺半。不过，气象预报人员希望，截至十一月结束的大西洋飓风季，接下来会比平时平静。原因之一，是数千英里外太平洋上发生的厄尔尼诺现象。

09 It occurs when waters in the central and eastern tropical Pacific become unusually warm. And while the National Oceanic and Atmospheric Administration, or NOAA, says that there's a strong chance this Super El Nino will become the strongest on record, aka lots of rain, that could mean fewer hurricanes. Our meteorologist Derek Van Dam is here to explain.

热带太平洋中部和东部海水异常变暖时，就会出现厄尔尼诺。美国国家海洋和大气管理局，也就是NOAA表示，这次超级厄尔尼诺很可能成为有记录以来最强的一次，意味着大量降雨，却也可能意味着更少的飓风。气象学家德里克·范达姆来解释。

10 Strong El Ninos, like the one that's building right now, have an outsized influence on the Atlantic hurricane season, reducing both the number and the strength of tropical systems. Now El Nino isn't just about the warmer waters here in the Pacific. It's also a change in global circulation patterns.

像目前正在形成的强厄尔尼诺，对大西洋飓风季有显著影响，会降低热带天气系统的数量和强度。厄尔尼诺不只是太平洋海水变暖，也涉及全球大气环流模式的变化。

11 These altered patterns shift sinking air across the tropical Atlantic, stabilizing the atmosphere, reducing thunderstorm development that's needed to create a hurricane. Additionally, these circulation changes, they help displace the jet stream across the tropical Atlantic. These strong upper-level winds create wind shear, which is a hostile environment for tropical development and can deliver a death blow to an emerging hurricane.

这些变化使热带大西洋上空出现更多下沉气流，稳定大气，减少形成飓风所需的雷暴发展。此外，环流变化会改变热带大西洋急流的位置。强劲的高空风形成风切变，为热带系统发展创造不利环境，甚至给新生飓风致命一击。

12 In the early stages of a tropical storm's life, it needs a calm environment at all levels of the atmosphere to grow. When wind shear is introduced, it disrupts this vertical alignment, making it harder for thunderstorms to organize into a tropical system and get stronger. Now think of a hurricane as a spinning top.

热带风暴形成初期，需要大气各层都相对平静才能成长。风切变会破坏这种垂直排列，使雷暴更难组织成热带系统并增强。你可以把飓风想象成旋转的陀螺。

13 Wind shear would be like pushing this top and altering its spin. This is particularly disruptive when the top is spinning slowly, just like the early formative stages of a tropical system. With more wind shear around, it's harder for budding hurricanes to get over that hump.

风切变就像推一下陀螺，改变它的旋转。陀螺转得较慢时，这种干扰尤其明显，就像热带系统刚形成时一样。周围风切变越多，新生飓风就越难跨过成长的门槛。

14 Now while wind shear and sinking air can put a big dent in tropical activity throughout the Atlantic, it doesn't eliminate it altogether. Previous El Nino seasons, like the destruction brought on by Hurricane Andrew in 1992, have proven that it only takes one landfall to make this a catastrophic season. So be hurricane ready this year by downloading the all-new CNN weather app.

虽然风切变和下沉气流能大幅抑制大西洋的热带活动，却不会完全消除它。以往厄尔尼诺年份，例如1992年安德鲁飓风造成的破坏，证明只需一次登陆，就能让整个季节变成灾难季。因此，今年可以下载全新的CNN天气应用，做好飓风准备。

15 From storms influenced by the ocean to storms literally made by fire, and scientists are calling in a Cold War legend to help understand them. NASA is using a modified version of a U-2 spy plane to study how wildfires help generate storms. The U-2, nicknamed the Dragon Lady, is capable of flying at extreme altitudes of up to 80,000 feet, more than twice as high as a typical commercial flight.

从受海洋影响的风暴，转向真正由火制造的风暴。科学家请来了一位冷战传奇帮忙研究。美国航天局正在使用改装的U-2侦察机，研究野火如何促成风暴。绰号“蛟龙夫人”的U-2，最高可飞到八万英尺，是典型民航飞行高度的两倍多。

16 It served as a crucial eye in the sky for the United States during the Cold War, and has played a pivotal role in aerial surveillance ever since. This version, dubbed the ER-2, is like a flying laboratory. Instead of spying on adversaries, though, it's spying on fire.

冷战期间，它是美国重要的“空中眼睛”，此后一直在空中侦察中发挥关键作用。这个称为ER-2的版本像一座飞行实验室，不过它监视的不是对手，而是火灾。

17 Scientists are getting a bird's eye view of pyrocumulonimbus clouds, or fire clouds, as they form. They're some of Earth's least understood weather phenomena. A wildfire can become so hot that it forces massive amounts of heated air, smoke, and moisture upward, and essentially builds its own thunderstorm.

科学家从高空观察火积雨云，也就是“火云”的形成过程。这是地球上最缺乏了解的天气现象之一。野火可以热到迫使大量热空气、烟雾和水汽上升，实质上制造出自己的雷暴。

18 These fire clouds can produce lightning, strong winds, and in some cases, fire tornadoes. Scientists hope that these missions will allow them to better understand and possibly predict these erratic storms in the future.

这些火云能产生闪电、强风，有时甚至火龙卷。科学家希望，任务能让他们更好地了解这些反复无常的风暴，并在未来预测它们。

19 Pop quiz hot shot!

随堂小测验，高手接招！

20 What color is a polar bear's skin? White, pink, tan, or black?

北极熊的皮肤是什么颜色？白色、粉色、棕褐色，还是黑色？

21 If you said black, very good! Polar bears have jet black skin to help them absorb heat from the sun, and while their fur coats appear white, they're actually clear. Their transparent hairs collect and scatter sunlight, making them appear white.

如果你选黑色，真棒！北极熊漆黑的皮肤能帮助吸收太阳热量。虽然皮毛看着是白色，毛发其实透明；透明毛发收集并散射阳光，因此呈现白色。

22 Our next story makes one point perfectly clear. Let sleeping bears lie.

下一个故事把一个道理说得很清楚：别打扰睡着的熊。

23 One man learned this the hard way. Disturbing a slumbering polar bear? This happened in Norway's Svalbard archipelago, a remote chain of arctic islands roughly halfway between mainland Norway and the North Pole. Last August, a person aboard a vessel reportedly sounded a fog horn near a sleeping polar bear.

一名男子为此付出了代价。打扰熟睡的北极熊？事情发生在挪威斯瓦尔巴群岛，这片偏远北极群岛大约位于挪威大陆与北极点中间。据报道，去年八月，一艘船上的人在睡着的北极熊附近鸣响雾笛。

24 Bear wakes up, bear moves away, and on Thursday, human gets billed. Authorities issued a fine of 50,000 Norwegian kroner, that's roughly 5,300 U.S. dollars, determining the horn was used to deliberately disturb the animal.

熊醒了，熊走了，到了周四，人收到罚单。有关部门认定鸣笛是故意干扰动物，处以五万挪威克朗罚款，约合五千三百美元。

25 Svalbard has strict protections for polar bears, including rules prohibiting people from unnecessarily disturbing, luring, or pursuing them, and people shouldn't wake them because they need their rest.

斯瓦尔巴对北极熊有严格保护，禁止无必要地干扰、引诱或追逐它们。人们不应叫醒它们，因为它们需要休息。

26 They're built to conserve energy in an environment where their next meal isn't guaranteed.

它们的身体适应了节省能量的生活方式，因为在那样的环境里，下一餐并无保障。

27 If we think we've achieved anything on our own, we're foolish. We've all had people help us become who we are. We're nothing more than conduits of knowledge and energy, and what we have is not for us to possess, it's for us to pass on.

如果我们以为任何成就完全靠自己取得，那就太傻了。每个人都曾得到他人帮助，才成为今天的自己。我们只是知识和能量的传递渠道，拥有的东西不是拿来独占，而是要传递下去。

28 Legendary coach Dusty Baker shared that message with my football team, and it stuck with me throughout my NFL playing days. We can gain great wisdom learning from our elders, right? Well, that's something that teenager Luke Morrison understood at a young age.

传奇教练达斯蒂·贝克曾向我的橄榄球队分享这段话，在整个NFL球员生涯中，我一直记着它。向长辈学习能获得很多智慧，对吧？少年卢克·莫里森很小就懂得这一点。

29 At 13, he took an old camper that his grandfather was ready to throw away and transformed it into a full-on military museum behind his house in Vermont. He collects rare items and stories to share with others. Darren Perrin from our affiliate WCAX has the story.

十三岁时，他接手了祖父准备丢掉的旧露营车，把它改造成佛蒙特州自家屋后的完整军事博物馆。他搜集珍稀物品和故事，与别人分享。合作电视台WCAX的达伦·佩林带来报道。

30 I've been interested in military history for a while.

我对军事历史感兴趣已经有一段时间了。

31 Luke's just 15. They could conceal like this.

卢克只有十五岁。“他们可以像这样藏起来。”

32 But knows more about military memorabilia than most people. It started with an ammunition box.

但他对军事纪念品的了解，比大多数人都多。一切始于一个弹药箱。

33 And I saw it as the coolest thing in the world.

我觉得那是世界上最酷的东西。

34 But it's grown to include rare finds, some prized possessions, like his grandfather's Air Force uniform.

后来，收藏扩展到各种罕见物品，以及一些珍爱的东西，比如祖父的空军制服。

35 He served in the States during Vietnam.

他在越战期间，在美国本土服役。

36 Not only collecting military souvenirs, but war stories too.

他不只收集军事纪念品，也收集战争故事。

37 I'm very grateful towards them and patriotic. I always come away very patriotic and a lot smarter than I was before.

我非常感激他们，也很爱国。每次交流后，我都更有爱国情怀，也比之前懂得更多。

38 And his collection has grown so much, he's had to expand. Luke just got a second mobile camper to take his museum on the road. It appears Luke is the youngest founder of a military museum in the country.

收藏越积越多，他不得不扩建。卢克刚获得第二辆露营车，准备把博物馆带上公路。他似乎是全国最年轻的军事博物馆创办人。

39 I feel like it's extremely important to A, remember history because there's a saying I like, if you don't remember history, you're going to repeat it. And B, we got to remember the sacrifice of the veterans and who gave us our freedom.

我觉得极其重要的有两点：第一，记住历史，我喜欢一句话，不记得历史就会重蹈覆辙；第二，我们必须记住退伍军人的牺牲，以及是谁给了我们自由。

40 Today's story, getting a 10 out of 10 proves that sometimes your job stinks until you strike gold. A construction crew in Belgium was installing a sewer line beneath a former brewery when their drill hit something decidedly not sewage, gold. And not just a little.

今天获得“十分满分”的故事证明，有时工作很“臭”，直到你挖到金子。比利时一支施工队在旧酿酒厂下方安装污水管道时，钻头碰到的东西绝不是污水，而是黄金，而且数量不少。

41 We're talking gold bars and coins worth an estimated 9 million Euros. That's about 10 and a half million US bucks. Authorities moved the treasure to a secure location while investigators worked to determine where it came from and who legally owns it.

那是一批金条和金币，估值九百万欧元，约合一千零五十万美元。有关部门已将宝藏移至安全地点，调查人员正确认其来源和合法所有人。

42 And my favorite part, one member of the construction crew was a student working a part-time job. That's worth putting on a resume. Teamwork, proficient in Word, and in locating buried treasures.

我最喜欢的一点是，施工队里还有一个打零工的学生。这值得写进简历：善于团队合作，熟练使用Word，并擅长寻找地下宝藏。

43 It is shout out time now. And first in line, all of the access teachers at Klein Cane High School in Spring, Texas. I see you keep inspiring and helping people shine. We so appreciate you.

现在是点名致意时间。首先是得克萨斯州斯普林克莱恩凯恩高中的所有Access项目教师。继续鼓舞别人、帮助大家发光，我们非常感谢你们。

44 And this shout out goes to Coach Bilbo and all of my Jaguars at North Pike Junior High in Summit, Mississippi. Rise up.

这一组致意送给密西西比州萨米特北派克初中的比尔博教练和所有“美洲豹”们。打起精神！

45 Thank you for subscribing and commenting on our CNN 10 YouTube channel for your shout out requests. Now, tomorrow is our very first Your Word Wednesday of the new season. Your word in the show.

感谢你们订阅CNN 10的YouTube频道，并留言申请点名。明天是新一季第一次“周三你的词语”，让你的词进入节目。

46 Put a unique vocabulary word and the definition in the comment section of our latest post on Instagram or TikTok, @CoyWire, @CNN10, and we're going to choose a winner to use in tomorrow's show. Put your school, name, city, and state in there, too, so we can show you some love. Make this a Tuesday terrific, and I'll see you tomorrow, sunshine.

请在我们Instagram或TikTok最新帖子的评论区，@CoyWire、@CNN10，写下一个特别的词和释义，我们会选出一个用在明天节目中。也请附上学校、姓名、城市和州，方便我们向你致意。祝这个周二精彩，明天见，阳光伙伴们。

47 I'm Coy Wire, and we are CNN 10.

我是科伊·怀尔，这里是CNN 10。

学习词汇 / 原稿注释

以下保留用户原稿的词汇释义，并省略音标；部分词义未必是本期语境中的用法，理解时请结合正文译文。

grim adj. 无情的；残忍的

outsized adj. 特大号的、超大型的; 极大的

alignment n. 列队，排列整齐

top n. 陀螺（同spinning top）

disruptive adj. 捣乱的，引起混乱的

budding adj. 萌芽的；发育期的

hump n. 危机，困难阶段

put a big dent 造成重大打击、带来明显影响

landfall n. 着陆；登陆

be hurricane ready 做好防飓 / 防台准备

surveillance n. 看守；监视

pyrocumulonimbus clouds 熱暴云 (是一种由极端热源（如强烈野火、火山爆发或核爆）引发并在烟流中形成的巨大积雨云)

erratic adj. 飘忽不定的；不稳定的；无规律的

tan n. 棕褐色

clear adj. 无色透明的

bill v. 开罚

krone n. 克罗讷（丹麦、挪威的货币单位）(名复: kroner)

lure v. 引诱，诱惑；以诱饵吸引

nothing more than 仅仅; 只不过是

conduit n. 导管; 渠道; 传递者

full-on 极度的, 非常棒的; 完全的

prized adj. 非常有價值的，非常重要的，極其珍貴的

possession n. 个人物品; 财产

patriotic adj. 爱国的

sewer n. 污水管，下水道

brewery n. 啤酒厂，酿造厂

decidedly adv. 确定地；断然地；明确地

sewage n. 污水；污秽物

proficient adj. 精通的，熟练的
