正文 / 英文与中文逐段对照

01 Hello and welcome to the show. I'm Coy Wire. This is CNN 10 and I hope you're having an awesome Friday Eve.

大家好，欢迎收看节目。我是科伊·怀尔，这里是CNN 10。希望你们的“周五前夜”过得很棒。

02 Mine got off to a rough start. My daughter asked, can I have a bookmark? Five years old and she still doesn't know my name is Coy. Let's get to your news for Thursday, August 20th, starting with some unsettling news.

我的一天开头不太顺。女儿问：“能给我一个bookmark（书签）吗？”都五岁了，她居然还不知道我叫Coy，不叫Mark。【玩笑把bookmark拆成“book, Mark”。】来看8月20日星期四的新闻，首先是一条令人不安的消息。

03 We've already seen more foodborne illness outbreaks in the United States this summer than in any of the previous five summers. We are on pace for a record. Experts say there are several reasons why.

今年夏天，美国食源性疾病暴发次数，已经超过之前五个夏天中的任何一个，正朝纪录水平发展。专家表示，原因有好几个。

04 Extreme summer heat can create conditions where some bacteria multiply faster, especially when food isn't kept at safe temperatures, and some pathogens are particularly tough to track down. Pathogens are things like bacteria, viruses, and parasites, and they're capable of causing disease. Funding cuts at the state, federal, and local levels have also made it harder to determine where these outbreaks start.

夏季极端高温会让部分细菌繁殖得更快，尤其在食物未保持安全温度时。有些病原体又特别难追踪。病原体包括能引起疾病的细菌、病毒和寄生虫。州、联邦和地方层面的经费削减，也使寻找疫情源头更加困难。

05 Speaking of outbreaks, a CNN investigation into one of the biggest companies tied to this summer's cyclospora outbreak, Taylor Farms, is shedding light on how they've handled similar situations in the past and what it could mean for food safety going forward. Our Kyung Law has more.

说到疫情，CNN调查了与今年夏天环孢子虫疫情有关的最大企业之一泰勒农场，揭示它过去如何应对类似事件，以及这对未来食品安全意味着什么。刘姜带来报道。

06 This is the headquarters for Taylor Farms.

这里是泰勒农场总部。

07 This is private property. Okay. Taylor Farms won't talk to us on camera today.

“这里是私人产业。” “好的。”泰勒农场今天不愿在镜头前与我们交谈。

08 We'd already asked for an interview and had not heard back. This is the company, the FDA linked to the historic cyclospora outbreak, 6,600 hospitalized and two dead. Here's what we want to ask the company.

我们此前已提出采访请求，但没有得到回复。美国食品药品监督管理局将这家公司与一次历史性环孢子虫疫情联系起来，造成六千六百人住院、两人死亡。以下是我们想问公司的问题。

09 The government traced at least five different outbreaks directly to Taylor Farms in the past 13 years, and a CNN review finds time after time the company turned to a similar playbook, deflecting blame. How?

过去十三年，政府至少把五次不同的疫情直接追溯到泰勒农场。CNN梳理发现，公司一次次使用相似的应对方式：转移责任。怎么做？

10 By relying on negative test results to imply that Taylor Farms products are not responsible, even though investigators mainly find the source of outbreaks by figuring out what and where people who got sick ate.

通过阴性检测结果，暗示泰勒农场产品没有责任，尽管调查人员主要是通过查明患病者吃了什么、在哪里吃，来寻找疫情源头。

11 It's deja vu all over again. I sort of feel like we're on a repeat record.

一切又似曾相识。我觉得像在听一张不断重复的唱片。

12 This month, Taylor Farms said, according to the FDA, there are no confirmed positive sample results for product testing for cyclospora as of August 5th, 2026. We are confident in our food and food safety systems.

本月，泰勒农场表示：“根据FDA，截至2026年8月5日，产品环孢子虫检测没有确认的阳性样本结果。我们对食品及食品安全体系有信心。”

13 Let's rewind through the known outbreaks linked to Taylor Farms. 2013, eerily similar cyclospora cases connected to Taylor Farms salad. CEO Bruce Taylor said at the time, all our tests have been negative and we have no evidence of cyclospora in our product.

回顾已知与泰勒农场有关的疫情。2013年，一起与其沙拉有关的环孢子虫病例与如今惊人相似。首席执行官布鲁斯·泰勒当时说：“我们所有检测都是阴性，没有证据表明产品中存在环孢子虫。”

14 2015, a multi-state E. coli outbreak. Taylor's public response, the tests were preliminary findings and it looks like a false alarm. The FDA later said a product with Taylor Farms produce was the likely source.

2015年，一场大肠杆菌疫情波及多个州。泰勒公开回应说，检测只是初步结果，看起来像虚惊一场。FDA后来表示，含泰勒农场农产品的一款产品很可能是源头。

15 2024, another E. coli outbreak traced to onions distributed by Taylor Farms. The company said it found no traces of the bacteria. All Taylor Farms products in the market today are safe to consume.

2024年，另一场大肠杆菌疫情被追溯到泰勒农场分销的洋葱。公司表示没有发现细菌踪迹：“目前市场上的所有泰勒农场产品都可以安全食用。”

16 I think they have played a little bit fast and loose with the facts.

我认为他们对事实有些随意取舍。

17 Food safety attorney Bill Marler has sued Taylor Farms a dozen times in multiple outbreaks representing more than 100 clients. He says the company implies its food may not be to blame by telling the public their testing found no trace of the microbes.

食品安全律师比尔·马勒在多次疫情中代表一百多名客户，起诉泰勒农场十几次。他说，公司通过告诉公众检测没有发现微生物，暗示食品可能不应承担责任。

18 But Marler says that doesn't prove anything.

但马勒表示，这并不能证明什么。

19 Taylor Farms is using those negative results to muddy the water. The scientists at Taylor Farms know better that the products that get tested are not the products that people consume. And I always say this and it sounds like I'm making a joke, but people eat the evidence.

泰勒农场正用这些阴性结果搅浑水。公司的科学家很清楚，被检测的产品不是人们已经吃下去的产品。我经常说一句听起来像玩笑的话：人们把证据吃掉了。

20 About half of America's domestic lettuce is grown here in the Salinas Valley in central California. It's also where Taylor Farms is headquartered.

美国国内大约一半的生菜，都种在加州中部萨利纳斯谷。泰勒农场总部也设在这里。

21 But the focus of this cyclospora outbreak is in central Mexico at the Taylor Farms facility there. The same plant linked to another cyclospora outbreak in 2013.

但这次环孢子虫疫情的焦点，是墨西哥中部的泰勒农场工厂。这家工厂也曾与2013年的另一起环孢子虫疫情有关。

22 It's the same facility. They're drawing iceberg lettuce in from the same area and expecting a different result.

还是同一家工厂，从同一个区域收购结球生菜，却期待不同的结果。

23 Taylor Farms tells CNN it invests more than $200 million a year in food safety. The problem is that nothing can kill cyclospora on fresh vegetables without cooking.

泰勒农场告诉CNN，公司每年在食品安全方面投入超过两亿美元。问题是，除了烹煮，没有办法杀死新鲜蔬菜上的环孢子虫。

24 Now to Colombia where communities are still reeling after last week's devastating 7.4 magnitude earthquake. As the nation begins the process of rebuilding, one of Colombia's most famous daughters is coming home to help. Shakira, the global superstar, returned this week to visit one of the hardest hit areas, the Choco Earthquake Zone.

接下来看哥伦比亚。上周毁灭性的7.4级地震过后，各社区仍深受创伤。国家开始重建时，哥伦比亚最著名的女儿之一回国助力。全球巨星夏奇拉本周返回，走访重灾区之一乔科地震灾区。

25 The four-time Grammy winner has inspired crowds on the biggest stages and now she's trying to inspire something even more powerful, hope. Shakira is helping rebuild 11 local schools in partnership with the Howard G. Buffett Foundation.

这位四届格莱美得主曾在最大的舞台上鼓舞人群，如今她希望唤起更强大的东西：希望。夏奇拉正与霍华德·G·巴菲特基金会合作，帮助重建十一所当地学校。

26 We are living through one of the worst tragedies Colombia has ever experienced, but we are united and we are going to fight and we are not going to stop until every child returns to school, until every child can regain a sense of normality, return to their life, to their friends.

我们正在经历哥伦比亚史上最严重的悲剧之一，但我们团结一致，会奋斗下去。直到每个孩子回到学校，重获正常生活的感觉，回到自己的生活和朋友身边，我们才会停下。

27 This is about more than just bricks and walls. It's about rebuilding routines, community, and a sense that tomorrow might be better than today. More than 280 people were killed and thousands more were injured in last week's quake.

重建的不只是砖墙，还有日常秩序、社区，以及明天可能比今天更好的信念。上周地震造成两百八十多人死亡、数千人受伤。

28 Now to Hong Kong, where artificial intelligence is helping a blind man navigate the world around him like never before. Chung Chi-Ming has been blind since birth, but now using a wearable AI device, he's able to explore and even go shopping in his city all by himself for the very first time. Check it out.

接下来到香港。人工智能正在以前所未有的方式，帮助一位盲人认识周围世界。Chung Chi-Ming自出生便失明，但如今借助可穿戴人工智能设备，他首次能够独自在城里探索，甚至购物。来看看。

29 This small device is transforming how 40-year-old Chung Chi-Ming navigates his city. It uses generative AI to detect his surroundings, translating into an audible format.

这个小设备正在改变40岁的Chung Chi-Ming在城市中行动的方式。它使用生成式人工智能检测周边环境，再转换成语音。

30 I'm completely blind, totally blind since birth.

我完全失明，从出生起就完全看不见。

31 Through AI technology, I can understand the world. Yeah, correct.

通过人工智能技术，我可以了解世界。对，没错。

32 Lamia Suraya Raman co-developed the device, called Seeker AI, to be hyperlocal.

拉米娅·苏拉娅·拉曼共同开发了这个名叫Seeker AI的设备，强调它对本地生活场景的适应。

33 Generative AI, or these chatbots, were built for people like you and me, sighted individuals. But what visual-impaired people need is another added layer of information. We've built our own database of information that any visual-impaired person can tap into and navigate.

生成式人工智能或这些聊天机器人，是为你我这样的明眼人打造的。但视障人士需要额外一层信息。我们建立了自己的信息数据库，让任何视障人士都能调用并据此行动。

34 That extra layer of detail on everyday life is what sets Seeker AI apart. While volunteering during COVID, Lamia realized the elderly and visually impaired people she met weren't using other assistive tech available on the market.

这一层关于日常生活的额外细节，让Seeker AI与众不同。疫情期间做志愿者时，拉米娅发现接触到的长者和视障人士，没有使用市面上其他辅助技术。

35 By pressing one button, Ming can get details like expiry dates, nutritional value, or price in up to 12 different languages.

只按一个按钮，阿明就能获得保质期、营养价值或价格等细节，并支持最多十二种语言。

36 If my friends, my family are not available, this technology is a very good kind of thing to help me to do things independently.

当朋友和家人没空时，这项技术能很好地帮助我独立办事。

37 Pop quiz, hot shot.Which species is believed to be the first domesticated by humans?

随堂小测验，高手接招！哪种动物被认为最早由人类驯化?

38 Horses, sheep, dogs, or birds?

马、羊、狗，还是鸟?

39 If you said dogs, bow wow wow, yippee yo yippee yay, you've unleashed the right answer.

如果你选狗，汪汪汪，太棒啦，你放出了正确答案!

40 Scientific evidence suggests domesticated canines were living alongside humans at least 14,000 years ago. Man's best friend for thousands of years.

科学证据表明，至少一万四千年前，家犬就已与人类共同生活。它们做了人类几千年的好朋友。

41 According to new research from the University of Vienna, Dogs are pretty good at reading the room.

维也纳大学的新研究显示，狗很擅长察言观色。

42 They can detect when we're happy, when we're sad, even scared. Researchers scanned the brains of eight dogs while showing them images of strangers, displaying emotions from happiness to sadness, anger, even fear. When the dogs saw happy human faces, researchers detected increased activity in brain regions associated with higher-level processing and reward.

它们能察觉我们高兴、悲伤，甚至害怕。研究人员向八只狗展示陌生人的照片，表情包括快乐、悲伤、愤怒和恐惧，并扫描它们的大脑。看到开心的人脸时，与高级信息处理和奖赏相关的脑区活动增强。

43 They responded differently to negative emotions, but their brains still showed distinct patterns of activity. So they may not know why we're having a rough day, but scientists suggest they may know something is up.

它们对负面情绪的反应不同，但脑内仍呈现出明确不同的活动模式。因此，科学家认为，它们可能不知道我们为何过得不顺，却能感觉到出了点事。

44 Today's story, getting a 10 out of 10, Hollywood's most famous sidewalk just added a groundbreaking new star.

今天获得“十分满分”的故事：好莱坞最著名的人行道上，新增了一颗具有开创意义的星。

45 Hailing from Benin, music icon Angelique Kidjo made history this week, becoming the first Black African performer to receive a star on the Hollywood Walk of Fame. Kidjo's career has spanned decades. She's earned a whopping 17 Grammy nominations, winning five of them, and she's collaborated with stars ranging from Alicia Keys to Bono to Quavo.

来自贝宁的音乐偶像安杰莉克·基乔本周创造历史，成为首位在好莱坞星光大道获得星星的非洲黑人表演者。她的职业生涯跨越数十年，获得十七次格莱美提名、五次获奖，并与艾丽西亚·凯斯、博诺、Quavo等明星合作。

46 At her ceremony, there was singing, dancing, there were tears. Here's some of what Kidjo had to say.

授星仪式上有歌声、舞蹈，也有泪水。听听基乔的一部分发言。

47 The star for me means that my vision of the world as a small village is a reality. We have the same needs, doesn't matter where we come from, which language we speak, which skin color we have. We are human. It's one human family. I don't believe in any other person telling me otherwise.

这颗星对我意味着，我眼中世界是一个小村庄的愿景成为现实。无论来自哪里、说什么语言、是什么肤色，我们有相同的需求。我们都是人，同属一个人类家庭。谁说不是这样，我都不相信。

48 Kidjo's impact extends far beyond music. She's served as a UNICEF Goodwill Ambassador since 2002 and co-founded the Batonga Foundation, which works to empower girls and young women in Africa.

基乔的影响远超音乐。她自2002年起担任联合国儿童基金会亲善大使，并共同创办巴通加基金会，致力于赋能非洲女孩和年轻女性。

49 Now from one superstar to some of you superstars,shout out to Coach Gillette at St. Andrew's Middle School in Columbia, South Carolina. Thank you for sharing some of your students' assignments with us, and congrats on being named Coach of the Year. That is awesome.

从这位巨星，转向你们这些超级明星。向南卡罗来纳州哥伦比亚圣安德鲁中学的吉列特教练致意。谢谢你分享学生作业，也恭喜你获评年度教练。太棒了！

50 This next shout out goes to Mr. Schaefer at Green Hill High School in Mount Juliet, Tennessee. Thank you for making us a part of your day, and be sure to send us some pictures of that pizza party. Happy Friday Eve.

下一组致意送给田纳西州朱丽叶山格林希尔高中的谢弗老师。谢谢你让我们成为你一天的一部分，别忘了寄来披萨派对的照片。祝“周五前夜”快乐！

51 Go make someone smile. It costs you nothing, only takes a moment, and it just may be the spark of joy someone needs. I'll see you tomorrow.

去让某个人微笑吧。这不花钱，只需片刻，却可能点亮对方需要的快乐。明天见。

52 I'm Coy Wire, and we are CNN 10.

我是科伊·怀尔，这里是CNN 10。

学习词汇 / 原稿注释

以下保留用户原稿的词汇释义，并省略音标；部分词义未必是本期语境中的用法，理解时请结合正文译文。

unsettling adj. 扰乱的；使人不安的

pathogen n. 病原体

cyclospora n. 环孢子虫

shed light on 阐明; 解释

deflect v.（使）轉向

deflect blame 推卸責任; 甩鍋

deja vu 似曾相识的感觉

rewind v.（使）倒回

eerily adv. 怪異地；恐怖地

preliminary adj. 初步的

false alarm 假警报

play fast and loose with 轻率地对待…

microbe n. 微生物；（尤指引起疾病的）细菌

muddy the water 把水搅浑、混淆视听; 使事情变得更复杂难懂

muddy v. 使浑浊

draw v. 获取，得到

normality n. 常态；正常

hyperlocal 超本地化

sight v. 观测；瞄准

tap into 利用; 善加运用

assistive adj. 辅助的

something is up 有事情发生了; 怪怪的; 不太对劲

hail v.（不用被动式）来自

Benin n. 贝南（非洲西部一共和国）

otherwise adv. 不同样地; 别样地

goodwill ambassador 亲善大使
