Scientists task these “unicorns of the sea” to gather crucial Arctic data

科学家请“海中独角兽”收集关键北极数据

根据用户提供的 english.txt 整理并翻译。英文段落下方为对应中文，原稿词汇注释收于文末。段落编号用于对照，原稿未提供时间码。

正文 / 英文与中文逐段对照

01 Narwhals are moonlighting as climate scientists, a 91-year-old pulled off a jaw-dropping, age-defying feat, and an ambulance powered by sunshine. Rise up, sunshine. I'm Coy Wire, 10 Minutes, Big World, let's get you your news.

独角鲸兼职气候科学家，91岁老人完成令人惊叹、挑战年龄的壮举，还有靠阳光驱动的救护车。振作起来，阳光伙伴们。我是科伊·怀尔，十分钟，大世界，来看新闻。

02 We begin in London with some uplifting health news that really is a breath of fresh air. A new study suggests the British capital's efforts to cut vehicle pollution in recent years may be helping children's lungs grow healthier. Researchers focused on the city's ultra-low emission zone, introduced in central London in 2019.

先看伦敦一条令人振奋、真正带来清新空气的健康消息。新研究显示，英国首都近年减少汽车污染的举措，可能帮助儿童肺部更健康地发育。研究聚焦于2019年在伦敦中心引入的超低排放区。

03 Drivers of vehicles that don't meet strict emission standards have to pay a daily charge, the idea being to put the brakes on tailpipe pollution. The study tracked thousands of kids in London and nearby Luton over several years. Before the clean air zone began, London's kids had higher exposure to traffic pollution and lower average lung function.

不符合严格排放标准的车辆，驾驶者须按日付费，目的是遏制尾气污染。研究多年追踪伦敦和附近卢顿的数千名儿童。清洁空气区设立前，伦敦儿童接触交通污染更多，平均肺功能更低。

04 But over the four years, between 2018 and 2022, researchers observed a 5% drop in children with clinically impaired lung function in London. In Luton, which didn't have a clean air zone but did make other changes like adding bike paths and lowering speed limits, the rate fell 2%. Researchers say this is the first evidence that clean air zones may actually help child development.

但2018年至2022年四年间，研究人员观察到，伦敦存在临床肺功能受损的儿童比例下降百分之五。没有清洁空气区、但采取增加自行车道和降低限速等措施的卢顿，下降百分之二。研究者说，这是清洁空气区可能真正帮助儿童发育的首个证据。

05 That matters because lungs do most of their growing while we're young. If they don't fully develop by early adulthood, the risk rises later in life for conditions including asthma, emphysema, and chronic bronchitis. So, this isn't just about cleaner air today. It could mean healthier lungs for decades.

这很重要，因为肺主要在年轻时成长。若到成年早期未充分发育，晚年患哮喘、肺气肿和慢性支气管炎等疾病的风险就会增加。所以，这不仅意味着今天空气更干净，也可能意味着未来数十年肺部更健康。

06 Now to Nepal, where nearly a week after catastrophic flooding tore through Himalayan communities, the search for the missing is becoming a race against both time and terrain. As of this taping, more than 1,200 people have died.

接下来看尼泊尔。灾难性洪水席卷喜马拉雅社区近一周后，寻找失踪者成为与时间、地形的双重竞赛。截至录制时，已有一千两百多人死亡。

07 Nearly 4,000 are still missing. Relief organizations are helping more than 80,000 residents who've been displaced. The United Nations says some of the hardest hit areas are still unable to even be contacted.

近四千人仍失踪。救援组织正在帮助八万多名流离失所的居民。联合国称，一些重灾区甚至仍无法取得联系。

08 Rescue crews are navigating destroyed roads, unstable mountainsides, while families wait for answers. And in a place where some communities can only be reached from the sky, helicopter crews have become a lifeline. Our Anderson Cooper caught up with one trailblazing pilot helping lead that mission, Nepal's first female helicopter captain, Captain Priya Adhikari.

救援队穿越毁坏道路和不稳定山坡，家属则等待消息。在一些只能从空中抵达的社区，直升机队成为生命线。安德森·库珀采访了一位参与领导任务的先驱飞行员：尼泊尔首位女性直升机机长普里娅·阿迪卡里。

09 It's a small place where so many people went missing.

这么小的地方，却有那么多人失踪。

10 It's extraordinary that you, I mean, the valley is so close and you are flying through this. It's extraordinary.

太了不起了。我的意思是，山谷这么狭窄，你却要从中飞过，真不容易。

11 Just imagine 20 helicopters flying on that valley. Yeah. Continuously talking with each other. That is actually a little bit of pressure to navigate and to radio at the same time and to know who is doing where. And we going to the same place, evacuating from the same place, like five or six helicopters landing. So we need to talk with each other so frequently. Yeah, that is actually.

想象二十架直升机在山谷里飞行，不停互相通话。既要导航、又要用无线电，还得知道谁在哪里做什么，压力不小。我们去同一个地点撤离，五六架直升机要在那里降落，所以必须频繁沟通。确实如此。

12 And now, I mean, you are landing in places where the ground is like liquid cement.

现在你们还要降落在像液态水泥一样的地面上。

13 Some of the places you have to be very careful because the helicopter might sink.

有些地方必须特别小心，因为直升机可能陷下去。

14 It looks from the air, I imagine, to a novice, it looks like, oh, it's solid ground. It's concrete.

我想，从空中看，一个新手会以为：“哦，这是坚实地面，是混凝土。”

15 No, it's not concrete. This thing that happened, it's bigger than the earthquake we had in 2015. During the earthquake time, it was in different places of Kathmandu or in Nepal. But this is like in a small valley where so many people have lost life. But the smile I have is for the survivors.

不，那不是混凝土。这次事情比2015年地震还严重。地震时，灾情分散在加德满都或尼泊尔不同地方，但这次一个小山谷就有那么多人失去生命。不过，我的笑容是给幸存者的。

16 I don't know how they survived. Every time I go inland, I see people around. I'm like waving at them and saying like, you survived. You know, the rescues that I'm doing, people lying down inside my helicopter trying to open their eyes. I smile at them and say like, you survived.

我不知道他们怎么活下来的。每次飞进内陆，看见周围的人，我都会挥手，像是在说：“你活下来了。”我救上来的那些人躺在直升机里，努力睁开眼睛，我就微笑着告诉他们：“你活下来了。”

17 Pop quiz, hot shot. A narwhal's famous tusk is made up of what?

随堂小测验，高手接招！独角鲸著名的长牙由什么构成?

18 Bone, ivory, keratin, or pixie dust.

骨头、牙质、角蛋白，还是精灵粉尘?

19 If you said ivory, you can toot your own horn.

如果你选ivory，也就是象牙一类的长牙牙质，就可以吹响自己的胜利号角。

20 Narwhal tusks are actually overgrown teeth, did you know? And they can grow up to 10 feet long and contain more than 10 million nerve endings.

你知道吗？独角鲸的长牙其实是过度生长的牙齿，可长达十英尺，包含一千多万个神经末梢。

21 Narwhals are known as the unicorns of the sea, but scientists are discovering they may make pretty incredible oceanographers. These elusive arctic whales are helping scientists collect data on the crucial ocean currents of a remote and hard-to-study corner of the planet, the rugged coast of East Greenland.

独角鲸被称为海中独角兽，但科学家发现，它们也许还是非常出色的海洋学家。这些难以追踪的北极鲸类，正帮助科学家收集地球一处偏远、难研究角落的重要洋流数据：东格陵兰崎岖海岸。

22 Scientists fitted six narwhals with satellite-transmitting sensors and tracked them for three years as they recorded things like water temperature and salinity in remote Greenland fjords. And the data are helping scientists better understand something called atlantification. That's when warmer, saltier Atlantic water pushes farther into Arctic waters.

科学家给六头独角鲸装上能通过卫星传输数据的传感器，追踪三年，让它们记录偏远格陵兰峡湾的水温、盐度等。这些数据帮助科学家更好了解“大西洋化”，也就是更温暖、更咸的大西洋海水深入北极海域。

23 And that matters because warmer ocean water can accelerate the melting of glaciers, which then contributes to rising sea levels. Scientists hope this new data will help them better understand the planet's ice sheet.

这很重要，因为较暖海水会加速冰川融化，进而推高海平面。科学家希望新数据帮助他们更好理解地球的冰盖。

24 If anybody tells you you're too old to chase a big dream, let's introduce them to Gray Beard.

如果有人说你年纪太大，不能追逐大梦想，我们就把“灰胡子”介绍给他。

25 Dale Sanders is 91 years old, and he just became the oldest person ever to complete the entire Appalachian Trail. That's roughly 2,200 miles stretching from Georgia all the way to Maine. He began his journey last September and finished atop Maine's highest mountain, Mount Katahdin, on Monday.

戴尔·桑德斯91岁，刚成为完整走完阿巴拉契亚步道的最年长者。全程约两千两百英里，从佐治亚一直延伸到缅因。他去年九月出发，周一在缅因最高峰卡塔丁山顶完成旅程。

26 This wasn't Sanders' first attempt at the trail. There is a huge, huge difference between hiking the trail at 82 years old and at 91. Huge difference. But it is possible, because I'm proving that.

这不是桑德斯第一次挑战步道。“82岁和91岁走这条路，有非常、非常大的区别。差别巨大。但这是可能的，因为我正在证明它。”

27 It is a dangerous hike. Sanders says he fell 71 times. One fall sent him to the hospital. But Gray Beard kept going. I had a chance to learn more about this trail on my own hike. Check this one out.

这趟徒步很危险。桑德斯说自己摔倒了71次，有一次还被送进医院，但“灰胡子”继续前进。我也曾亲自徒步，进一步了解这条路线。来看看。

28 It kills you physically and you're not sleeping well and you're getting bit by bugs. Ripped open feet. You just keep hiking through it.

身体被折磨得厉害，睡不好，又被虫咬，脚磨破了，但你还得继续往前走。

29 Hiking like this for six hours would be a tall task for most, but then there are people who hike this thing for six months. That's just mind-blowing.

这样徒步六小时，对大多数人都很艰难，却有人要走六个月。这简直令人震撼。

30 You see this white blaze, you know you're on track. That white blaze is the iconic marking of the Appalachian Trail, and it guides hikers along this 2,000-mile contiguous footpath running from Springer Mountain, Georgia to Maine's Mount Katahdin. I've hiked only a tiny sliver of it today, but I want to know more about the trail and the unique individuals like Matt, trail name Road Soda, who dropped everything to conquer it.

看到这道白色标记，就知道没走错。白色标记是阿巴拉契亚步道的象征，引导徒步者沿着从佐治亚斯普林格山到缅因卡塔丁山的两千英里连续步道前进。我今天只走了极小一段，但想更多了解步道，以及像马特这样放下一切来征服它的人。他的徒步昵称是“路上汽水”。

31 You do start to think, like, why am I still doing this? AT hikers spend most nights in tents, but hostels like this allow them to rest up and reconnect.

你确实会开始想：“我为什么还在做这件事？”阿巴拉契亚步道徒步者多数夜晚睡帐篷，但这样的旅舍能让他们休息、重新联络。

32 You have tramilies out here. It's a trail family and usually just forms by the people that are doing the same miles as you a couple nights in a row. That's kind of how you create friends.

这里有tramily，也就是步道家庭。通常是连续几个晚上，和你走相近里程的人自然组成的，友谊就这样建立。

33 I love this man. You don't see him for a couple days, and then when you see him again, it's like you found your long-lost friend again.

我爱这个兄弟。几天没见，再见时，就像找回失散很久的朋友。

34 You develop bonds through shared adversity that's just, it's pretty incredible.

你们通过共同面对逆境，建立起纽带，那种感觉真的不可思议。

35 Thru-hikers suffer through freezing cold, searing heat, rain, wind, loneliness, exhaustion, and lots of pain.

全程徒步者要忍受严寒、酷热、雨、风、孤独、疲惫，以及很多疼痛。

36 It's a lovely shade of lilac.

这是一种挺好看的淡紫色。

37 My knees have hurt pretty much the entire time.

我的膝盖几乎一路都在疼。

38 Three out of four Thru-hikers don't even make it to Maine, but those who push through the pain discover joy, pride, and maybe a new outlook on their planet and fellow humans.

每四名全程徒步者中，就有三名甚至到不了缅因。但忍痛坚持的人，会找到快乐、自豪，也可能获得看待地球和同类的新视角。

39 There's this, like, really, really strong community.

这里有一种非常、非常强大的社群感。

40 Everybody's so on your side all the time.

每个人一直都很支持你。

41 Every memory resurfaces out here because you just have so much time. And you just look out and just see how beautiful our planet is from a different angle.

在这里，所有回忆都会浮现，因为你有太多时间。向外望去，就能从不同角度看见我们的星球有多美。

42 There is hope. Four months after we met him, Road Soda and his tramilies finally reached the top of Mount Katahdin. The end of one journey and perhaps the beginning of another.

总有希望。与我们见面四个月后，“路上汽水”和步道家人终于登上卡塔丁山。一段旅程结束，也许另一段才刚开始。

43 As rough as this can be, I don't want to leave this life behind.

虽然这生活会很艰苦，我还是不想离开。

44 Today's story, getting a 10 out of 10, an ambulance that runs on sunshine, connecting health care with communities in Kenya. A team of 23 Dutch students called Solar Team Eindhoven tested a prototype solar-powered medical clinic named Stella Juva.

今天获得“十分满分”的故事，是一辆靠阳光行驶的救护车，把医疗服务连接到肯尼亚社区。一个由23名荷兰学生组成、名叫埃因霍温太阳能团队的队伍，测试了名为Stella Juva的太阳能移动诊所原型。

45 The vehicle carries equipment that can include ultrasound machines, portable x-rays, and other basic diagnostic tools to rural communities far from health facilities and unreliable electricity. The vehicle drove more than 800 kilometers, about 500 miles, through Kenya. The student team says the prototype navigated rough roads and unpaved roads successfully.

车辆可携带超声设备、便携式X光机和其他基础诊断工具，前往远离医疗设施、供电不稳定的农村社区。它在肯尼亚行驶了八百多公里，约五百英里。学生团队称，原型车成功通过崎岖和未铺装道路。

46 So from testing in Kenya, we gathered that Stella Juva is able to handle off-road terrain and being able to drive up to hundreds of kilometers. What we also gathered is that Stella Juva gathers more energy from the sun than it uses with all its medical equipment on board, meaning that we can deliver continuous health care.

在肯尼亚测试后，我们发现Stella Juva能应对越野地形，行驶数百公里。还发现，它从太阳获取的能量，比车上全部医疗设备消耗的更多，意味着能持续提供医疗服务。

47 The nearly 3,000 pound vehicle was said to be an early demonstration project with more testing ahead, but for communities with a lack of access to health care, this solar-powered ambulance could be a link to a brighter future.

据介绍，这辆近三千磅的车还只是早期示范项目，仍需更多测试。但对难以获得医疗的社区而言，这辆太阳能救护车可能是通向更光明未来的纽带。

48 Students looked at a problem. Instead of saying somebody should fix that, they started building something. That is what we call a 10 out of 10.

学生们看见一个问题，没有只说“应该有人解决”，而是动手造东西。这就叫“十分满分”。

49 All right, superstars, it is shout-out time.This one goes to Mrs. Devoid at Murray Middle School in Wilmington, North Carolina, who sent this incredible collection of art and cards and messages.

好了，超级明星们，点名致意时间。送给北卡罗来纳州威尔明顿默里中学的德沃伊德老师，她寄来了这一大批精彩的画作、卡片和留言。

50 Hi, Dara. Yeah, this one. That's upside down, but that's me. Thank you guys so much for making us a part of your day.

你好，达拉。对，这一张，拿倒了，但那是我。非常感谢你们让我们成为一天的一部分。

51 You made our day. Stay curious, stay kind, shine on, sunshine. I'm Coy Wire and we are CNN 10.

你们让我们这一天很开心。保持好奇、善良，继续发光吧，阳光伙伴们。我是科伊·怀尔，这里是CNN 10。

学习词汇 / 原稿注释

以下保留用户原稿的词汇释义，并省略音标；部分词义未必是本期语境中的用法，理解时请结合正文译文。

narwhal n.【动】独角鲸

moonlight v.【口】做兼职

pull off 成功；做成某事

tailpipe n.（车辆等的）排气管

emphysema n.【医】气肿；肺气肿

bronchitis n.【医】支气管炎

trailblazing adj. 开疆辟土的；开拓性的；有开创性的

ivory n.（海象等的）長牙

keratin n.【化】角质，角素

pixie n. 小妖精；小精灵

toot v. 吹喇叭（或号角等）；发出嘟嘟声

nerve ending 神经末梢

oceanographer n. 海洋学家

elusive adj. 难以理解的; 难以描述（或找到、达到、记起）的

rugged adj. 崎岖的

salinity n. 盐性；盐度

fjord n. （尤指挪威海岸边的）峡湾

atlantification n. 大西洋化

ice sheet 冰原; 大陆冰川

rip v. 划破

tall task: tall order 的变体或误用，意思是一件非常困难或难以做到的任务

mind-blowing adj. 令人震撼; 令人惊叹; 大开眼界

blaze n. 鲜明的色彩

contiguous adj. 连续的

trail name 长距离徒步旅行时，其他山友或前辈根据你的外表、行为或经历送给你的专属称号

hostel n. 旅舍（尤其指青年旅舍）

tramily 步道家庭; trail（步道 / 山徑） + family（家庭）

adversity n. 逆境

thru-hiker 穿越徒步者; 通径徒步(从头到尾完整走完一条长距离步道的健行者)

searing adj. 烧灼的；灼痛的；剧烈的

lilac n. 紫丁香色，淡紫色
