CNN 10

2026.08.20 / 听力挖空练习

How an AI chatbot is helping this blind man 'see' for the first time

共30题。每空填写原文中的1至3个英文单词；留意拼写、单复数及词形。

方括号[01]为题号，P01为原稿段落号。答案集中在末页，练习时请先遮住。

建议先浏览正文，再配合本期视频听写；完成后重听检查，每题1分，满分30分。

姓名：_____ 练习日期：_____ 得分：___ / 30

依据用户提供的字幕原稿制作，未与视频核验。难度参考雅思听力，采用原文挖空形式，非官方模拟试卷。

听写正文 / QUESTIONS 01–30

P01 Hello and welcome to the show. I'm Coy Wire. This is CNN 10 and I hope you're having an awesome Friday Eve.

P02 Mine got off to a rough start. My daughter asked, can I have a bookmark? Five years old and she still doesn't know my name is Coy. Let's get to your news for Thursday, August 20th, starting with some unsettling news.

P03 We've already seen more foodborne illness [01] _____ in the United States this summer than in any of the previous five summers. We are on pace for a record. Experts say there are several reasons why.

P04 Extreme summer heat can create conditions where some bacteria multiply faster, especially when food isn't kept at [02] _____, and some pathogens are particularly tough to track down. Pathogens are things like bacteria, viruses, and parasites, and they're capable of causing disease. Funding cuts at the state, federal, and local levels have also made it harder to determine where these outbreaks start.

P05 Speaking of outbreaks, a CNN investigation into one of the biggest companies tied to this summer's cyclospora outbreak, Taylor Farms, is shedding light on how they've handled similar situations in the past and what it could mean for [03] _____ going forward. Our Kyung Law has more.

P06 This is the [04] _____ for Taylor Farms.

P07 This is [05] _____. Okay. Taylor Farms won't talk to us on camera today.

P08 We'd already asked for an interview and had not heard back. This is the company, the FDA linked to the historic cyclospora outbreak, 6,600 [06] _____ and two dead. Here's what we want to ask the company.

P09 The government traced at least five different outbreaks directly to Taylor Farms in the past 13 years, and a CNN review finds time after time the company turned to a similar playbook, [07] _____. How?

P10 By relying on [08] _____ to imply that Taylor Farms products are not responsible, even though investigators mainly find the source of outbreaks by figuring out what and where people who got sick ate.

P11 It's deja vu all over again. I sort of feel like we're on a repeat record.

P12 This month, Taylor Farms said, according to the FDA, there are no confirmed positive sample results for product testing for cyclospora as of August 5th, 2026. We are confident in our food and food safety systems.

P13 Let's rewind through the known outbreaks linked to Taylor Farms. 2013, eerily similar cyclospora cases connected to Taylor Farms salad. CEO Bruce Taylor said at the time, all our tests have been negative and we have no [09] _____ of cyclospora in our product.

P14 2015, a multi-state E. coli outbreak. Taylor's public response, the tests were [10] _____ and it looks like a false alarm. The FDA later said a product with Taylor Farms produce was the likely source.

P15 2024, another E. coli outbreak traced to onions distributed by Taylor Farms. The company said it found no traces of the bacteria. All Taylor Farms products in the market today are safe to [11] _____.

P16 I think they have played a little bit fast and loose with the facts.

P17 Food safety attorney Bill Marler has sued Taylor Farms a dozen times in multiple outbreaks representing more than 100 [12] _____. He says the company implies its food may not be to blame by telling the public their testing found no trace of the microbes.

P18 But Marler says that doesn't prove anything.

P19 Taylor Farms is using those negative results to muddy the water. The scientists at Taylor Farms know better that the products that get tested are not the products that people consume. And I always say this and it sounds like I'm making a joke, but people eat the evidence.

P20 About half of America's [13] _____ lettuce is grown here in the Salinas Valley in central California. It's also where Taylor Farms is headquartered.

P21 But the focus of this cyclospora outbreak is in central Mexico at the Taylor Farms [14] _____ there. The same plant linked to another cyclospora outbreak in 2013.

P22 It's the same facility. They're drawing iceberg lettuce in from the same area and expecting a different result.

P23 Taylor Farms tells CNN it [15] _____ more than $200 million a year in food safety. The problem is that nothing can kill cyclospora on fresh vegetables without cooking.

P24 Now to Colombia where communities are still reeling after last week's devastating 7.4 magnitude earthquake. As the nation begins the process of [16] _____, one of Colombia's most famous daughters is coming home to help. Shakira, the global superstar, returned this week to visit one of the hardest hit areas, the Choco Earthquake Zone.

P25 The four-time Grammy winner has inspired crowds on the biggest stages and now she's trying to inspire something even more powerful, hope. Shakira is helping rebuild 11 local schools [17] _____ the Howard G. Buffett Foundation.

P26 We are living through one of the worst tragedies Colombia has ever experienced, but we are united and we are going to fight and we are not going to stop until every child returns to school, until every child can regain a sense of [18] _____, return to their life, to their friends.

P27 This is about more than just bricks and walls. It's about rebuilding [19] _____, community, and a sense that tomorrow might be better than today. More than 280 people were killed and thousands more were injured in last week's quake.

P28 Now to Hong Kong, where artificial intelligence is helping a blind man navigate the world around him like never before. Chung Chi-Ming has been blind since birth, but now using a [20] _____ AI device, he's able to explore and even go shopping in his city all by himself for the very first time. Check it out.

P29 This small device is transforming how 40-year-old Chung Chi-Ming navigates his city. It uses generative AI to detect his surroundings, translating into an [21] _____.

P30 I'm completely blind, totally blind since birth.

P31 Through AI technology, I can understand the world. Yeah, correct.

P32 Lamia Suraya Raman co-developed the device, called Seeker AI, to be hyperlocal.

P33 Generative AI, or these chatbots, were built for people like you and me, sighted individuals. But what visual-impaired people need is another added layer of information. We've built our own [22] _____ of information that any visual-impaired person can tap into and navigate.

P34 That extra layer of detail on everyday life is what sets Seeker AI apart. While [23] _____ during COVID, Lamia realized the elderly and visually impaired people she met weren't using other assistive tech available on the market.

P35 By pressing one button, Ming can get details like expiry dates, [24] _____, or price in up to 12 different languages.

P36 If my friends, my family are not available, this technology is a very good kind of thing to help me to do things [25] _____.

P37 Pop quiz, hot shot.Which species is believed to be the first domesticated by humans?

P38 Horses, sheep, dogs, or birds?

P39 If you said dogs, bow wow wow, yippee yo yippee yay, you've unleashed the right answer.

P40 Scientific evidence suggests domesticated canines were living [26] _____ humans at least 14,000 years ago. Man's best friend for thousands of years.

P41 According to new research from the University of Vienna, Dogs are pretty good at reading the room.

P42 They can detect when we're happy, when we're sad, even scared. Researchers scanned the brains of eight dogs while showing them images of strangers, displaying emotions from happiness to sadness, anger, even fear. When the dogs saw happy human faces, researchers detected increased activity in brain regions associated with higher-level processing and [27] _____.

P43 They responded differently to negative emotions, but their brains still showed [28] _____ of activity. So they may not know why we're having a rough day, but scientists suggest they may know something is up.

P44 Today's story, getting a 10 out of 10, Hollywood's most famous sidewalk just added a groundbreaking new star.

P45 Hailing from Benin, music icon Angelique Kidjo made history this week, becoming the first Black African performer to receive a star on the Hollywood Walk of Fame. Kidjo's career has spanned decades. She's earned a whopping 17 Grammy [29] _____, winning five of them, and she's collaborated with stars ranging from Alicia Keys to Bono to Quavo.

P46 At her ceremony, there was singing, dancing, there were tears. Here's some of what Kidjo had to say.

P47 The star for me means that my vision of the world as a small village is a reality. We have the same needs, doesn't matter where we come from, which language we speak, which skin color we have. We are human. It's one human family. I don't believe in any other person telling me otherwise.

P48 Kidjo's impact extends far beyond music. She's served as a UNICEF Goodwill Ambassador since 2002 and co-founded the Batonga Foundation, which works to [30] _____ girls and young women in Africa.

P49 Now from one superstar to some of you superstars,shout out to Coach Gillette at St. Andrew's Middle School in Columbia, South Carolina. Thank you for sharing some of your students' assignments with us, and congrats on being named Coach of the Year. That is awesome.

P50 This next shout out goes to Mr. Schaefer at Green Hill High School in Mount Juliet, Tennessee. Thank you for making us a part of your day, and be sure to send us some pictures of that pizza party. Happy Friday Eve.

P51 Go make someone smile. It costs you nothing, only takes a moment, and it just may be the spark of joy someone needs. I'll see you tomorrow.

P52 I'm Coy Wire, and we are CNN 10.

参考答案 / ANSWER KEY

2026-08-20 · 共30题。以下为对应空格的原文答案；P编号便于回查中英对照稿。

本练习自评时不区分大小写，拼写与单复数须符合原文。每题1分；此分数不换算为雅思分数。

题号	答案	段落
01	outbreaks	P03
02	safe temperatures	P04
03	food safety	P05
04	headquarters	P06
05	private property	P07
06	hospitalized	P08
07	deflecting blame	P09
08	negative test results	P10
09	evidence	P13
10	preliminary findings	P14
11	consume	P15
12	clients	P17
13	domestic	P20
14	facility	P21
15	invests	P23
16	rebuilding	P24
17	in partnership with	P25
18	normality	P26
19	routines	P27
20	wearable	P28
21	audible format	P29
22	database	P33
23	volunteering	P34
24	nutritional value	P35
25	independently	P36
26	alongside	P40
27	reward	P42
28	distinct patterns	P43
29	nominations	P45
30	empower	P48
